

Integrated Security Situation Awareness

Is2Aware

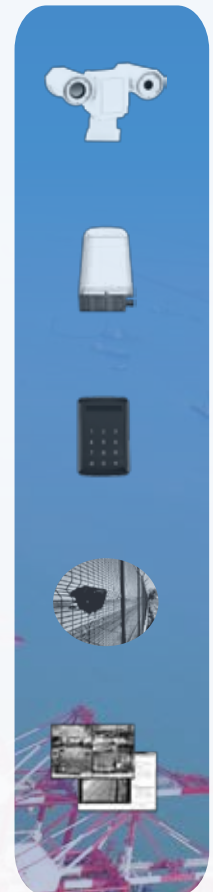

The next generation Integration and Critical Operations Management Platform

Is2Aware is the next generation Situation Awareness Command & Control platform. It supports security, surveillance and reaction operations of governmental or industrial organizations. Is2Aware provides the robust software platform to easily engineer mission critical Systems-of-Systems and meet any demanding requirement. It offers spatial aware monitoring of critical infrastructures, large areas, campuses and facilities. Its main features include incident management, easy integration with any device or other subsystem and intuitive user interfaces. It is a key solution for control center operators, executives, officers, as well as field forces. Is2Aware provides a unified and integrated operational picture across all organizational roles.

Is2Aware Integration Capabilities

Is2Aware has limitless integration capabilities aggregating data, video feeds and alarms from sensors and 3rd party systems. Is2Aware can also monitor the underlying utility networks and devices so as to provide a complete view of possible system failures that may affect the operational systems. When needed, building a new gateway to a 3rd party system is a breeze with Is2Aware's gateway SDK.

- ▶ CCTV and Video Management Systems
- ▶ Advanced Video Analytics
- ▶ Radars
- ▶ Building Intrusion Alarm Systems
- ▶ Fire Alarm Systems
- ▶ Access Control (Person and Vehicle)
- ▶ Perimeter Intrusion Detection Systems
- ▶ BMS, SCADA and IoT
- ▶ Business Operations and ERP
- ▶ Location Based Devices (GPS, AIS)

Is2Aware Features

- ▶ First Responders Management
- ▶ Intuitive and Versatile Views
- ▶ Unified Alarm Engine
- ▶ Smart Zone Management
- ▶ Track Management and Identification Friend or Foe (IFF)
- ▶ Human intelligence
- ▶ Network of Cameras Track & Control
- ▶ Video Analytics and VMS Integration
- ▶ Decision Support
- ▶ Built-in Video Wall Management
- ▶ System Health Monitoring
